Novelly (11)	Claims	NONE	NO
Inventive step (IS)	Claims	1-24	YES
mvomivo stop (10)	Claims	NONE	NO
Industrial applicability (IA)	Claims	1-24	
	Claims	NONE	NO
1			

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1: US 6,484,137 B1 D2: US 6,232,540 B1

1. Novelty and Inventive Step

D1 discloses an audio reproducing apparatus which is capable of converting the audio playback speed into a desired value and obtaining the desired audio result. D2 relates to a time-scale modification method and apparatus that performs time-scale modification on digital signals, which are modified without being changed in original pitches with respect to time scale in accordance with desired time-scale modification factors.

With regard to Claims 1, 7, 14, 17 and 19, the subject matter of the claims is regarded as ensuring a perfect synchronization between a video signal and an audio signal by modifying a reproduction time of the audio signal in proportional to a predetermined time-scale.

Therefore, novelty and an inventive step can be acknowledged for the subject matter of Claims 1, 7, 14, 17 and 19.

The other claims also comply with PCT Article 33(2) and (3) as they are dependent claims.

2. Industrial Applicability

Claims 1-24 meet the criteria set out in PCT Article 33(4).

The claims are directed to a method for ensuring a perfect synchronizing between an audio signal and a video signal both of which have been modified in time-scale and reproducing a digital television signal by using the same.
